

Google Sites Enrichment Project

The following list of items must be included in the IWeb project, in addition to completed graphic organizers and Type 2's. All research found in graphic organizers must be displayed on each themed web page. Please see Mr. Reggio for direction or explanations to the criteria listed.

1. **Home Page** – The Home Page will summarize all of the information that can be accessed throughout the created web pages. The Home Page must include pictures and a one-paragraph summary. Use Mr. Reggio's Home Page as a starting point and/or example to help you get started.
2. **Research Pages** – each graphic organizer will be represented as a web page. 5 pieces of information will be incorporated, or a Type 2. In addition, add pictures and/or any other relevant information to the topic. The title of the page will be represented by the research title.
3. **Works Cited Page** – Create a bibliography that showcases all of the resources used for the project. Many of the graphic organizers have the web site needed for research listed, in addition, any printed materials used for research have a stamp identifying the web site, day used, etc. Use the graphic organizers provided by Mr. Reggio to help with formatting.
4. **Minimum of 2 Videos** – video clips can be taken from Discovery Education or Google videos. Videos can be displayed on any page and must connect to the topic or theme of that particular page.
5. **Photo Gallery** – a photo gallery page must be created, and a minimum of 30 pictures must be incorporated. The creator of the web page can determine a specific theme for the photo gallery.

Google Sites Directions

- All Type 2's must be typed in Google Document.
- Be sure to set a goal each day. What do you want to accomplish?
- Ask for help when needed!
- Be sure to follow the rubric. The rubric is the road map to building the site.
- Reading is powerful! Follow directions.

Name _____ Period _____

Rubric

- _____/25 points **Home Page** – The Home Page will summarize all of the information that can be accessed throughout the created web pages. The Home Page must include pictures and a one-paragraph summary.

- _____/100 points **Research Pages** – Each graphic organizer will be represented as a web page. 5 pieces of information will be incorporated, or a Type 2. In addition, add pictures and/or any other relevant information to the topic. The title of the pages will be represented by the research titles. There are 10 total research graphic organizers.

- _____/25 points **Works Cited Page** – Create a Works Cited page. Use the “works cited” graphic organizer to help with format. In addition, go through each research graphic organizer and cite web pages used to collect data and research.

- _____/25 points **Minimum of 2 Videos** – Video clips can be taken from Discovery Education or YouTube. Videos can be displayed on any page (or their own page) and must connect to the topic or theme of that particular page. Create a title for each video.

- _____/25 points **Photo Gallery** – a photo gallery page must be created, and a minimum of 30 pictures must be incorporated. The creator of the web page can determine a specific theme for the photo gallery. Pictures can be accessed through Google images or Discovery Education.

- _____/200 points
