Create a Travel Itinerary! *Traveling the World!*

Objective: Create a travel itinerary that follows a strict budget predetermined by your teacher. The itinerary will include the price of airline tickets, hotels, car rental, 3 excursions, food and spending money during a 14 day trip to any country in the world! Use the checklist below to help gather information, ultimately leading to a well-planned trip. A written summary describing the planned trip will be constructed using a Collins Type 2 and presented in class. The project will be chunked into three phases with different due dates: An Excel Spreadsheet (100 points), Collins Writing (50 points), and classroom presentation (125 points).

Part I - Checklist for Research Data – Excel Spreadsheet

1. Choose a country and city anywhere in the world.
2. Find a flight for 2 people departing from Philadelphia or any city within the region (Expedia.com or Travelocity.com – student can choose any “travel” site that offers airfare, hotels, etc.).
3. List hotel prices per night for the travel itinerary (Expedia.com or Travelocity.com) using Excel to display all of the data (refer to example for format).
4. Rent a car (if you need a car) or budget money for cabs, the subway, or buses!
5. Budget a set amount of money per day for food (estimation) and spending money.
6. Budget money for spending. \$100 per day?
7. Choose 3 different destinations to visit (destinations can be anywhere in or around a city). Include the cost of any excursions while visiting the 3 destinations.
8. Using an Excel spreadsheet, display the total cost of the pre-determined trip.

2 WEEK VACATION – 2 PEOPLE – \$10,000 BUDGET
